SUMMARY

Outside-of-the-box thinker with a drive and passion for building intuitive and customer engaging web apps. Organization and communication skills cement strong leadership abilities. Loves being part of a team who works together to accomplish great things. Has an immense thirst for knowledge and enjoys sharing it with the team and others.

Skills

Languages	JavaScript, Python, SQL, HTML, CSS, SASS
Frameworks	Express, Node, Django, Vue
Libraries	React, React Native, Redux, jQuery, Materialize, Bootstrap
Databases	PostgreSQL, Sequelize, MongoDB, Mongoose
Other	AJAX, Axios, Git, Heroku, RESTful Web Services, HTML Canvas, CSS Grid

Project Highlights

rand-num-gen - NPM module

September 2018

Created an npm module that generates a random number and has options for returning an integer vs a float, the length of the decimal, and allows skipping numbers.

Visio Infographic - Indigo Slate (for Microsoft)

August 2018

Responsible for delivering the entire infographic, including logic, style, responsiveness, and animations. Followed design to ensure pixel perfect site as well as added extra features and animations to make site lively, including custom accordion and sticky side button.

SnapCap

April 2018

This Django / Python and Vue app offers users a way to upload pictures, caption other users' pictures, and upvote the funniest pictures and captions. Used Axios calls to PostgreSQL in order to render new pictures and captions in real time. Dynamically rendered Upvotes, Followers, and the top caption per picture using Vue with Vuex.

Ryde

March 2018

A React and Node / Express app, Ryde allows users to search for carpools, post their own, and manage their 'Rydes' and 'Dryves.' Built user authentication with bcrypt, dynamic search functionality using Axios, and a rating system for 'Ryders' and 'Dryvers' by utilizing Redux state. Handled routing with React Router.

Technical Experience

Indigo Slate, Bellevue, WA

August 2018

As a contracted front end developer, this role entailed building multiple front end sites for Microsoft, an Indigo Slate client. In addition to developing, this involved brainstorming meetings about what animations could be added and how best to meet the client's wants while staying within the deadline. As lead developer on these projects, responsibilities included time management amongst developers and designers to keep away scope creep, fully meeting design specs, ensuring full responsiveness, addressing all of the customer's needs, and overall making the project pixel perfect.

Education

General Assembly

Web Development Immersive
2018

480+ hour, project-focused web development bootcamp. Learned two coding languages and multiple frameworks, libraries, databases, and other web development principles.

University of Florida

B.A. - French
2009

Non-Technical Roles

Application Solution Consultant

AT&T

2014-2017

Consulted businesses about their technical needs.

Virtual Cloud Specialist

AT&T

2012-2014

Managed cloud sales funnel for the Western Region.

Retail Sales Consultant

AT&T

2010-2012

Worked with customers to suggest best phone and work through phone issues.

Other Activities

Musician/producer (guitar, drums, keys, saxophone, Logic Pro X), Crossfitter, snowboarder
